HYBRID TEA ROSES

This is the largest and most important class of Roses, for the Hybrid Teas are the Monthly or Everblooming type. They furnish fine, fragrant blooms in garden and in pots. The bushes usually grow 1½ to 3 feet high and should be planted about 15 inches apart in beds. If planted relatively close together they will shade the ground, keeping it cooler and in better condition for the Roses during the Summer.

Ami Quinard. Deepest red. The long buds, opening into medium-sized flowers, are freely produced on an erect bush. 15 petals. \$1.25.

Angels Mateu. Plant Pat. 174. A lovely orange shade. Large, full-petaled, splendid form, fine for exhibition. Erect, strong grower. Rich fruity fragrance. \$1.50.

Cecile Walter. The long slender buds open to a large, loose, graceful bloom of lovely salmon-pink. Medium growth with very stems. 28 large petals. \$1.50.
